Egypt, Cairo
LinkedIn • Portfolio

Backend Developer with 3+ years of experience designing and building robust server-side applications using Node.js and modern JavaScript frameworks. Skilled in building scalable RESTful and GraphQL APIs, implementing authentication systems, and integrating cloud services (AWS, GCP). Proficient in database design (SQL and NoSQL), performance tuning, and secure software development practices. Passionate about system architecture, automation, and delivering clean, maintainable code in agile team environments.

Education

Bachelor Degree in accounting at Tanta University, Tanta

September 2019 - May 2023

Grade: Good

PROFESSIONAL EXPERIENCE

Backend Developer at Anspire Agency, Egypt, New Cairo

May 2023 - Present • ↗

- Lead the backend development of scalable web applications, ensuring high performance and security
- Architect and implement RESTful APIs, improving system efficiency and data integrity.
- Optimize database structures and queries using SQL and MongoDB for enhanced data processing.
- Mentor junior developers, conducting code reviews and knowledge-sharing sessions.

fullstack developer at Freenet, Germany, Remote

October 2022 - April 2023 • ↗

- Developed and optimized key application modules, contributing to an efficient software ecosystem.
- Conducted in-depth debugging and troubleshooting to enhance system stability.
- Worked in a distributed team, ensuring smooth software releases and performance improvements.

Fullstack developer at Consulta, Egypt

January 2021 - May 2022

- Designed and developed a comprehensive client management system with React.js and Node.js.
- Built and maintained robust authentication and real-time communication features.
- Implemented scalable APIs and database solutions to support business needs.
- Ensured system security and data integrity through best coding practices and performance optimizations.
